Online Speller

Πέμ, 06/11/2008 - 17:30 — webmaster

The **Online Speller** is an application of Neurolingo's Speller [1]. It helps you locate Greek and English misspelled words in your text.

Enter the text that you want to spell-check and push the 'Check Spelling' button. Any words not found in the Speller's dictionary will appear in red color. Click on such a word and you will see the spelling alternatives.

var edit_googiespell1variable = new GoogieSpell("/sites/all/modules/neurolingo/googiespell/", "/api/speller?lang="); edit_googiespell1variable.setLanguages({"el": "Greek"}); edit_googiespell1variable.lang_chck_spell = "Έλεγχος ορθογραφίας"; edit_googiespell1variable.lang_revert = "Επιστροφή σε"; edit_googiespell1variable.lang_close = "Κλείσιμο"; edit_googiespell1variable.lang_rsm_edt = "Επιστροφή στην επεξεργασία"; edit_googiespell1variable.lang_no_error_found = "Δε βρέθηκαν ορθογραφικά λάθη"; edit_googiespell1variable.lang_no_suggestions = "Δεν υπάρχουν προτάσεις"; edit_googiespell1variable.setSpellContainer("edit_googiespell1container"); edit_googiespell1variable.decorateTextarea("edit-googiespell1-spell");
