About us

Παρ, 16/05/2008 - 17:05 — webmaster

Who we are

Neurolingo consists of computer engineers and linguists specialized in natural language processing. Neurolingo was established in December 2005 by the members of Neurosoft [1] Language Technology Team.

What we do

- We develop language resources and software systems for the computational description and processing of Modern Greek: Morphological Lexicon [2], Thesaurus [3], Hyphenator [4], Speller [5], Lemmatizer/Stemmer [6], etc.
- We provide high quality and broad coverage proofing tools for word processors and desktop publishing systems: MS Office [7] (Win and Mac), Open/Star/Neo Office [8] (Win, Mac and Linux) and QuarkXpress 4.03-5.0 [9] (Win).
- We publish hardcopy versions of our electronic dictionaries; Thesaurus of Modern Greek [10] is at the bookstores since the end of August '05, printed and distributed by Patakis Publications.
- We offer the capability to use our language tools via Internet (*see* Online Tools [11]).
