Training workshops on electronic dictionary design by NEUROLINGO in collaboration with KONDYLI

Mon, 18/01/2010 - 17:26 — webmaster

NEUROLINGO in collaboration with KONDYLI (http://www.kondyli.gr [1]) provides their expertise and experience in a workshop specialised in electronic lexicography. The domain of electronic lexicography includes a series of activities related to designing, developing and managing various electronic language resources such as human-readable dictionaries, computational dictionaries for natural language processing systems, text collections (corpora), etc. The main purpose of this workshop is participants to learn how to use databases and computational tools for lexicographic applications.

Specifically: what information includes an electronic dictionary and what is its structure, steps in the construction of a lexicographical database (collection, encoding and testing data, renewal / extension), automatic and semi-automatic search across corpora, grammatical formalism for the representation of lexical information, information retrieval based on regular expressions, applications of the electronic dictionaries, etc.
